Location: Kenya

PROFESSIONAL PROFILE

Dedicated and highly motivated Information Technology student currently in the fourth year of study with hands-on experience in software development, computer networking, ICT support, system administration, and technical training. Skilled in designing and implementing technology solutions, troubleshooting computer systems, configuring networks, and developing web applications. Passionate about emerging technologies, cybersecurity, cloud computing, and digital transformation.

TECHNICAL SKILLS

Programming & Development

- Python
- Java
- JavaScript
- TypeScript
- HTML5
- CSS3
- Django Framework
- React.js
- Tailwind CSS
- Node.js

Database Management

- MySQL
- PostgreSQL
- SQLite

Networking

- Cisco Packet Tracer

- IP Addressing and Subnetting
- Network Segmentation
- Router and Switch Configuration
- LAN/WAN Setup and Maintenance
- Network Troubleshooting
- Structured Cabling

Operating Systems

- Windows Administration
- Linux Administration

ICT Support

- Computer Installation and Maintenance
- Hardware Troubleshooting
- Software Installation and Configuration
- User Support and Help Desk Operations

Productivity Tools

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Google Workspace

PROFESSIONAL EXPERIENCE

ICT Attaché

TVET Institution

Responsibilities

- Conducted computer literacy training sessions on Microsoft Office applications.
- Assisted in computer setup, installation, maintenance, and troubleshooting.
- Trained students on networking fundamentals using Cisco Packet Tracer.
- Demonstrated network design concepts including star and mesh topologies.

- Assisted in network management and connectivity support.
- Guided students through practical programming exercises using Code::Blocks.
- Provided technical support to staff and students.

PROJECTS

TSafari Transport Booking System

Technologies: Django, Python, SQLite, Tailwind CSS

- Developed a web-based transport booking platform.
- Implemented authentication and user management features.
- Designed customer and driver dashboards.
- Managed trip booking and status tracking functionalities.

Enterprise Network Design Simulation

Technologies: Cisco Packet Tracer

- Designed and simulated departmental networks.
- Implemented subnetting and IP addressing schemes.
- Configured routing and switching services.
- Tested network connectivity and performance.

Personal Portfolio Website

Technologies: React, TypeScript, Tailwind CSS

- Developed a responsive portfolio website.
- Showcased projects, technical skills, and professional achievements.
- Applied modern UI/UX principles.

SOFT SKILLS

- Problem Solving
- Communication Skills
- Team Collaboration
- Technical Training
- Critical Thinking

- Time Management
- Adaptability

PROFESSIONAL INTERESTS

- Software Development
- Cybersecurity
- Computer Networking
- Cloud Computing
- Artificial Intelligence
- Emerging Technologies
